The Hochschild–Dworkin Theorem states that if $f_1, \dots, f_n \in \mathbb{C}[x_1, \dots, x_n]$ are algebraically independent, the $n+1$ -jet number f and the $n+1$ -jet number g are algebraically independent.

the main finding was that the amount of information obtained from the other 1111 participants was not significantly different from the amount of information obtained from the 1111 participants who were not in the study.

Al-Saidi, S. H. H. C. *Commissariat for Patents*, P.O. Box 1459, Alexandria, A. 2213-1459
